## **Lesson 1 Problem-Solving Practice**

## **Estimate Products of Fractions**

Estimate by using rounding or compatible numbers. Show how you found your estimates.

RECIPES For Exercises 1-3, use the table at the right and the information below.

The table gives some of the ingredients that are needed to make a German chocalate cake.

German Chocolate Cake	
$\frac{3}{4}$ c boiling water	4 egg whites, stiffly beaten
$1\frac{3}{4}$ c butter	2 c sugar
4 egg yolks	1 tsp vanilla
4 oz chocolate	$2\frac{3}{4}$ c flour

- **1.** Rubin needs to make three German chocolate cakes for a fundraiser. About how many cups of flour will he need?
- **2.** Jordana wants to make six German chocolate cakes for a bake sale at her school. About how many cups of boiling water will she need?
- **3.** Dexter needs to make five German chocolate cakes for a surprise party at a recreation center. About how many cups of butter will he need?
- **4. WATER** Marcia is making a habit of drinking at least 7 cups of water a day. About how many cups of water did she drink if she drank  $\frac{3}{4}$  the number of cups she wanted to drink?
- **5. TRAVEL** Seth has been driving for  $4\frac{3}{4}$  hours at 62 miles per hour. About how many miles has he driven?
- **6. MAIL** The U.S. Postal Service delivers about 212 billion pieces of mail each year. Of this mail,  $\frac{4}{5}$  is sent by big commercial users. About how many pieces of mail are sent by big commercial users each year?
