**Lesson 4 Extra Practice**

*Ratio Tables*

**Complete each ratio table to solve each problem.**

1. A principal needs 2 chaperones for every 25 students at the school dance. How many chaperones does he need if 225 students are expected to be at the dance?

| Chaperones | 2 | ■ | ■ |
|---|---|---|---|
| Students | 25 | ■ | 225 |

2. Nyoko is having a pizza party. If two large pizzas serve 9 people, how many pizzas should she order to serve 27 guests at the party?

| Pizzas | 2 | ■ |
|---|---|---|
| Guests | 9 | 27 |

3. A store is having a sale on CDs. Adrian buys 5 CDs and spends $40. If he decides to go back to the sale and buy 2 more CDs, how much will he pay?

| CDs | 5 | 2 |
|---|---|---|
| Total Cost ($) | 40 | ■ |
