Comparison Shopping

Abrianna is buying clothes for school. She needs 3 pairs of pants, 2 new shirts, 6 pairs of socks, and a new backpack. The two stores she has checked are both having sales. Help Abrianna decide where she should buy each item by finding the total sale amount she would spend for each item at each store. Then, under each store, list the items she should buy from it and the total amount she would spend there.

Alphie's Department Store
