

Lesson 1 Problem-Solving Practice

Integers and Graphing

SCUBA For Exercises 1–3, use the table below. The table shows the depths of scuba diving attractions on a certain dive tour.

Attractions	Depth (ft)
Coral reef	−22
Modern shipwreck	−98
Old shipwreck	−108
Cave	−16

<p>1. Graph the integer representing the depth of the coral reef on a number line.</p> <div></div>	<p>2. Hiromi took pictures of both shipwrecks. Graph the integers that represent the depths of the shipwrecks on a number line.</p> <div></div>
<p>3. Sandra swam in the cave and around the coral reef. Graph the integer that represents the depth of the cave on a number line.</p> <div></div>	<p>4. SCIENCE The liquid in Beaker A has a temperature of -4°C. The liquid in Beaker B has a temperature of 2°C. Graph the integers that represent the temperatures on a number line.</p> <div></div>
<p>5. STEPS Catesby ran up 16 flights of stairs. Write an integer to represent this situation.</p>	<p>6. CELL PHONE Nazir used more minutes on his cell phone than his plan allows. He now owes his parents \$15. Write an integer to represent this debt.</p>
<p>7. CAVE The entrance of a cave is at an elevation of 14 meters. The lowest part of the cave is at an elevation of -86 meters. Write an integer to represent the elevation of the entrance to the cave.</p>	<p>8. MONEY Larry lost 45 cents when it fell out of his jacket pocket while he was playing. Write an integer to represent this loss.</p>
